OBJECTIVE

My strong work ethic sets me apart in the professional world. Consistently delivering high-quality work on time is a point of pride. Each project receives dedicated attention to detail, with full ownership taken for all responsibilities. Eagerly embracing new challenges allows for continuous growth and skill development. As a team member, sharing expertise comes naturally, as does stepping into leadership roles when needed. This commitment to ongoing improvement and maintaining high professional standards drives all aspects of my work. By focusing on reliability, dedication, and collaborative spirit, the aim is to contribute positively to any work environment while constantly refining personal and professional abilities.

WORK EXPERIENCE

Website Developer Aug 2019 — Sep 2019
Tumo Center for Creative Technologies
Led the design and development of several websites for high-pro le clients, gaining experience in project management, teamwork, and problem-solving

Entrepreneur 2018 — 2019
Retail Trade
Established a successful retail business, developing strong skills in sales, customer service, and inventory management

Focus Group Organizer Aug 2019
Local Government Elections
Demonstrated excellent communication skills while organizing and managing a focus group for local government elections

PHP Yii2 CRM Intern Apr 2023 - Jun 2023
Full Stack Developer
I developed a project which is called a Youmee Tech and that analyzes innate character traits, mental and physical characteristics based on portrait photos and initial data. I utilized PHP, Yii2, JavaScript, and jQuery for this project. My responsibilities included implementing full-stack development for the CRM system but mostly oriented to frontend.

Grig Family Inc. (GROCERA) Jun 2023 - Oct 2023
Full Stack Developer
I contributed to GROCERA, an LA-based online grocery platform offering curated organic products. The platform focused on freshness, local partnerships, and customer satisfaction. I worked with technologies such as PHP, Yii2, Laravel, JavaScript, Vue.js, and jQuery to develop and maintain the platform.

STEP IT Academy Jun 2023 - Aug 2024
Teacher
I instructed children's courses in various programming languages and platforms including C++, Arduino, Python, JavaScript, and Roblox Studio. My role involved developing and delivering curriculum for these diverse programming languages and platforms, ensuring engaging and educational experiences for students.

Davel Web Oct 2023 - present
Full Stack WordPress Developer
I have completed over 20 projects using WordPress and various web development tools. My responsibilities encompass full-stack development, from design conceptualization to implementation. I manage all aspects of web development projects, ensuring high-quality, functional, and visually appealing websites for clients.
